

06 WATER DISIPATOR FOR OUTDOOR UNITS EscoEva

MUND^{CLIMA}

Description:

EscoEva water dissipator is a great solution for eliminating water produced in the outdoor unit - without drain pipes.

Features

- Available in 110/220 V.
- Low energy consumption: only when water gets in. No electrical consumption with no water.
- Evaporation Performance: 1,5 l/h.
- Several side connectors for high condensation capacity. Installation at high level optimises the evaporation system.

Dimensions:

170 x 110 x 55 mm.

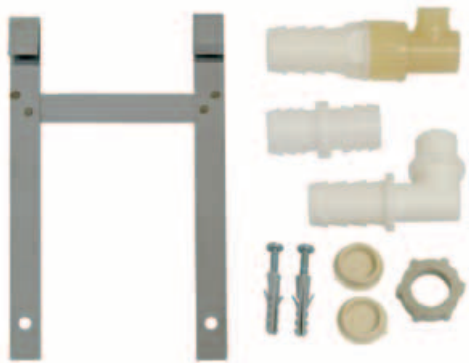

Part Nr.

AS 06 933

Accessories:

Installing a flow regulator on the hose prevents water excess.

- Stainless steel plate for wall mounting
- Fixing screw and rawplug
- Locking caps
- 1 threaded connector with nut
- 1 threaded 90° elbow connector with nut
- User's Manual
